

WIGS4U & HEADWEAR4HAIRLOSS

1) Place shaped part on head with ties draping down.

WRAP AROUND TYING INSTRUCTIONS

2) Cross ties over at back, bringing round to front on opposite sides

3) Bring ties up crossing over at the top, twisting them a bit as they go. Twist the ties as little or as much as suits.

4) Bring the first twisted tie firmly round to the back and tuck in securely, then do the same with the other

5) View from the back. The ends of the tie have been left visible in order to demonstrate the tucking

6) Front view of finished wrap. Method of twisting and securing is partly a matter of personal preference but practise helps.
